I am an Informatics Engineering graduate (Associate Degree) with professional experience in full-stack web development, backend engineering, cybersecurity, and server management. I have experience developing and maintaining web applications, e-commerce platforms, public-service systems, and ERP solutions using Laravel, PHP, PostgreSQL, and MySQL. I am also experienced in identifying web security vulnerabilities and managing production infrastructure. I am committed to continuous learning and delivering secure, scalable, and reliable digital solutions.

Work Experiences

PT Samsudi Indoniaga Sedaya - **Semarang, Indonesia** Apr 2025 - Juny 2025

Fullstack Developer

PT Samsudi Indoniaga Sedaya is a company focused on exporting a wide range of authentic Indonesian products to Japan. We are committed to delivering high-quality Indonesian goods to the Japanese market through reliable logistics and efficient distribution channels.

- Developed a responsive portfolio website with Laravel and MySQL in 3 weeks.
- Integrated a custom CMS enabling non-technical users to update content easily.

Komejepang - **Okayama, Japan** May 2025 - Aug 2025

Cybersecurity Engineer

Komejepang is a Japan-based e-commerce platform providing a wide range of authentic Indonesian products to meet the daily needs of Indonesian migrant workers living in Japan. We are committed to helping the Indonesian community access their favorite products through fast and reliable delivery services.

- Conducted penetration testing on komejepang.com, identifying critical XSS and IDOR vulnerabilities.
- Documented findings and guided teams in patch validation, improving security compliance by 30%.
- Proactively developed web security skills through continuous research and self-training.

CAN Creative - **Semarang, Indonesia** Aug 2025 - Aug 2026

Backend Developer

- Developed and maintained backend systems using Laravel and MySQL for company profile, e-commerce, job-seeker, and hotel certification platforms for the Indonesian Hotel and Restaurant Association (PHRI).
- Developed and maintained multiple official digital public-service applications for Polrestabes Semarang, Polres Cilacap, and Polres Karanganyar, using Laravel and PostgreSQL, enabling citizens to report emergencies, criminal incidents, and security disturbances.
- Managed and maintained servers and production infrastructure for Libas, ensuring application availability, reliability, and smooth system operations.
- Developed an ERP system for ASABA using Laravel and PostgreSQL, implementing Sales, Warehouse, and Reporting modules to support integrated business operations and management.

Education Level

Politeknik Negeri Semarang - **Semarang Indonesia** Aug 2023 - Aug 2026

Associate of Informatic Engineering, 3.92/4.00

- 2nd Place E-Government Innovation Category, KMIPN VII 2025

Skills, Achievements & Other Experience

- **TOEIC (Test of English for International Communication)** (2026): Achieved a TOEIC score of 630, demonstrating English proficiency for professional and workplace communication.
- **MikroTik Certified Network Associate (MTCNA)** (2026): MikroTik Certified Network Associate certification demonstrating foundational knowledge of networking, MikroTik RouterOS, routing, and network configuration
